

All About

Senior High

WELCOME!

Welcome to every single one of you who is coming to senior high starting next semester!

1 Self-Study

- Different from junior high, here is something called “self-study” in senior high! Students usually use self-study for their extra studies, or to work on their homework. The frequency of self-study times depends on the subjects that you are listening to! Since the 9th grade doesn’t listen to any APs, there will be about 6 self-studies in a week! Use your time wisely!

2 E-book

- In senior high, we don’t use paper textbooks, but online e-books! Subjects like history, math, or science (chemistry, biology, physics, etc...) study with an E-book, so bringing your laptop or tablet to your class is essential! However, don’t use your electronic devices for playing and not paying attention during class. Senior high teachers are always watching us!!

3 Advanced Placement (AP)

- Extracurriculars are also important, but your academics can’t be out of your hand! If you find a field or major that interests you in high school, take an AP related to that! AP helps you to learn more about the future major that you are interested in. However, if you can’t handle it, just don’t take it. It will just ruin your GPA!!

4 Extracurriculars

- Senior high has various kinds of extracurriculars that students can participate in! Starting from NHS, you can open your own club as well. Try as much as possible for your transcript and also for precious experience at high school!

5 College class

- Senior high is a very important part of your life where you choose your future career, and major. We have a separate subject called “college class” with Ms. Lanie, our college counselor!! 9th grade listen to the class as a whole and learn about basic things that you need to do as a senior high. Starting from 10th grade, you will be preparing for your future more specifically than before.

It will be tough, but you will learn lots of things here as well. You are always welcome to ask for any help from older-grade students! So don’t be scared, and let’s enjoy our senior high life together!!
